

# Creación de un sitio web Joomla

Luisa Blanco Mula

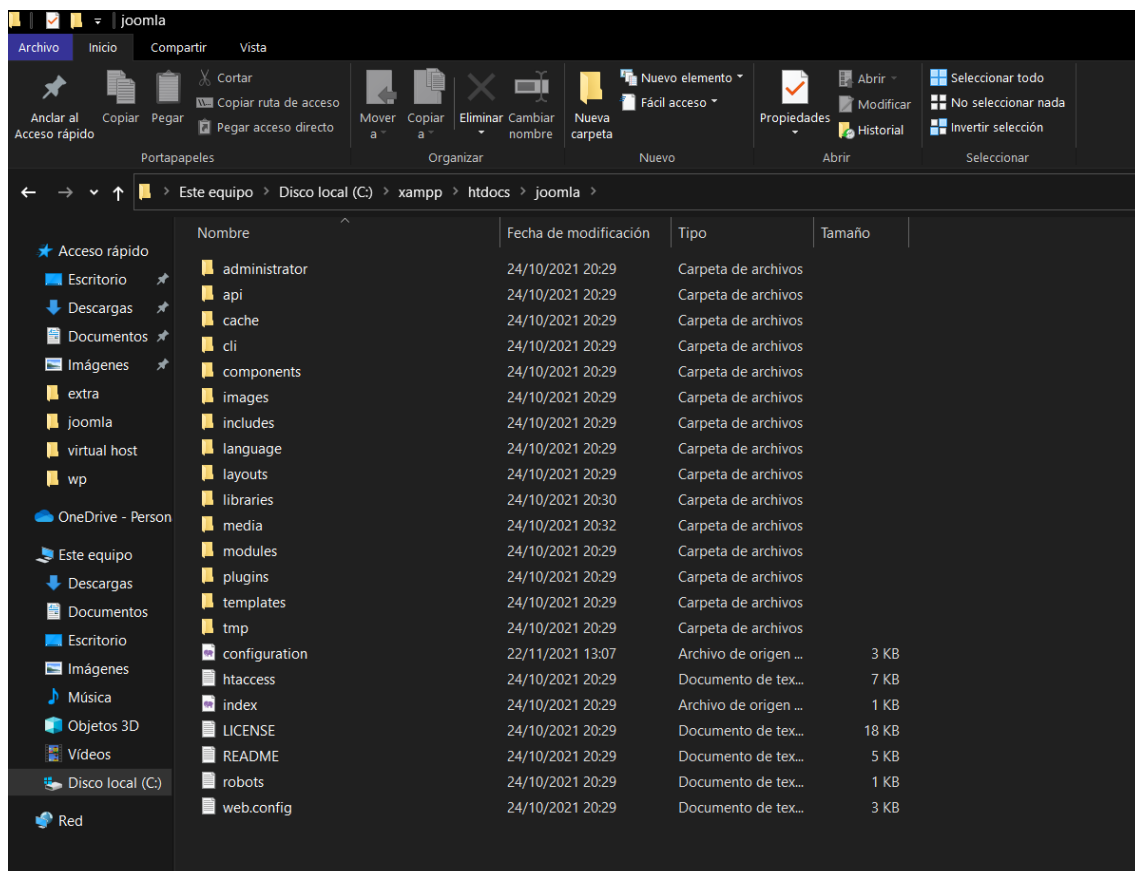

2º DAW CENEC – Málaga

La descarga del software se realiza desde la página oficial de Joomla

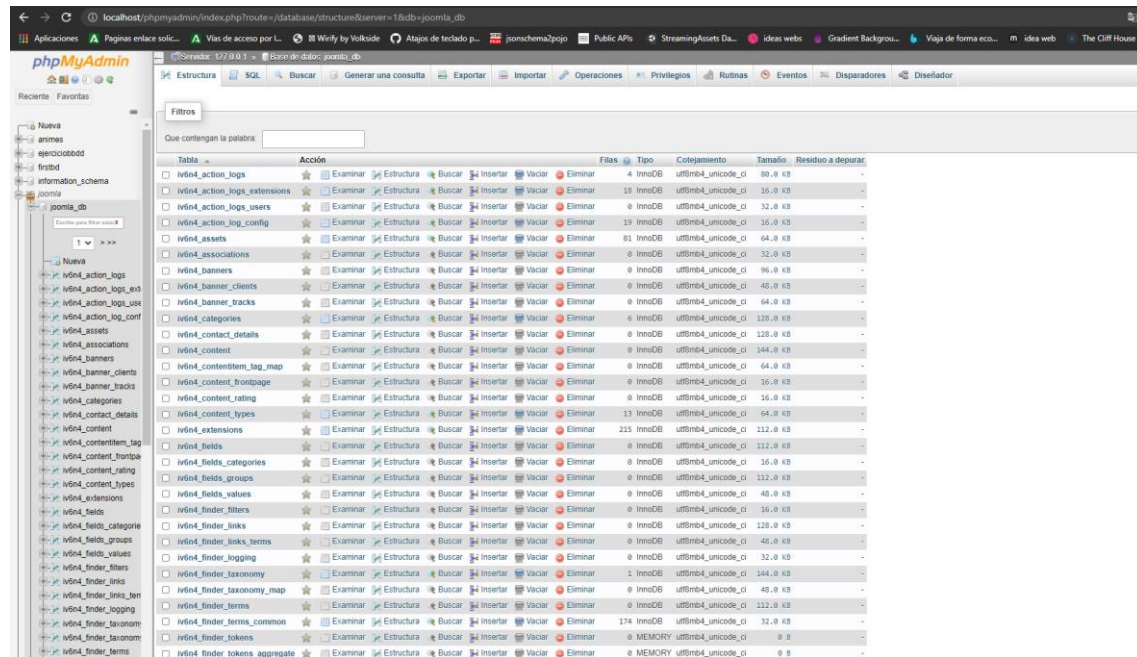

<https://downloads.joomla.org/es/>

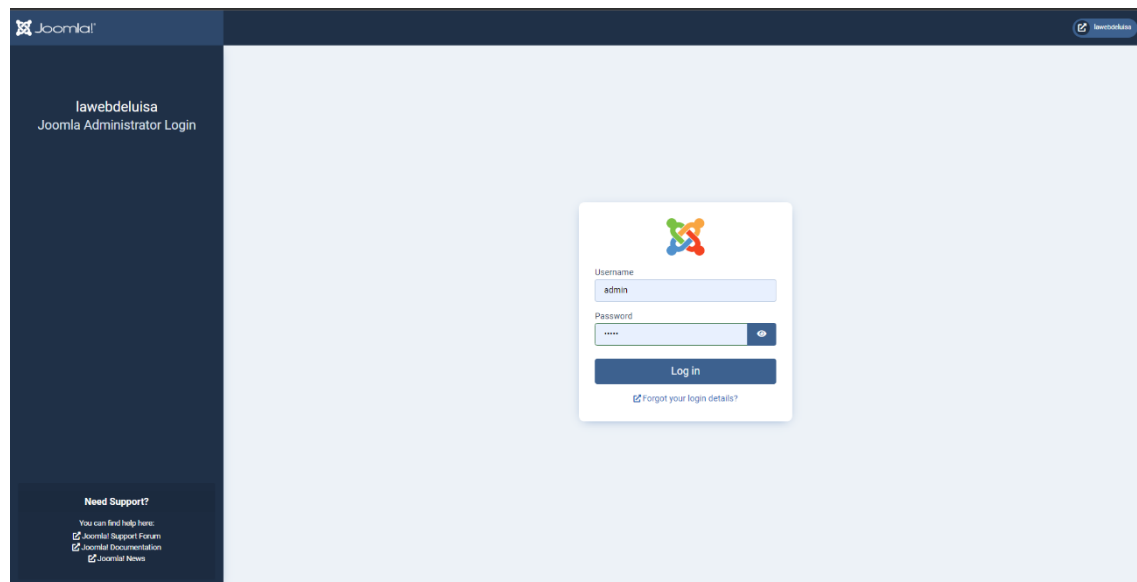

Accedemos ahora a la carpeta localhost dentro de la instalación XAMPP de nuestro equipo, creamos una nueva carpeta “Joomla” y descomprimos el fichero .ZIP descargado en dicha ubicación.

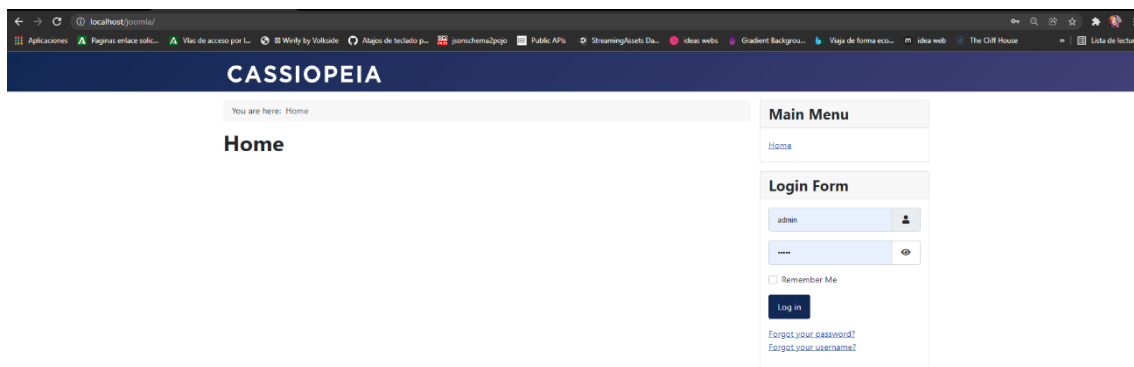

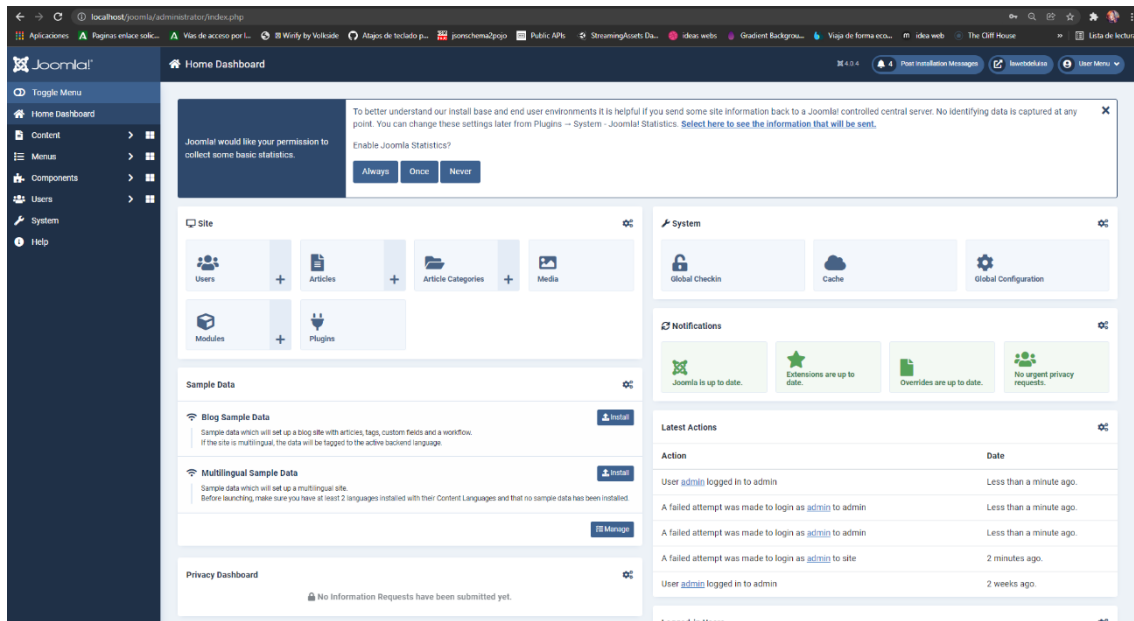

Una vez descargado creamos una base de datos en PhpMyAdmin denominada Joomla

Al acceder a la dirección “localhost/Joomla/Joomla/” podemos comenzar a configurar nuestra instalación. Debido a que la configuración inicial ya se ha realizado, las imágenes que se muestran pertenecen a la sección Settings de mi sitio web en Joomla.

| Search                    |       |          |                                     |                                     |   |                             |                     |                     |
|---------------------------|-------|----------|-------------------------------------|-------------------------------------|---|-----------------------------|---------------------|---------------------|
| Filter Options Clear      |       |          |                                     |                                     |   |                             |                     |                     |
